NEWS RELEASE

Tigray Files Technical Report for Terakimti Initial Mineral Resource Estimate

Vancouver, BC, March 13, 2014 – Tigray Resources Inc. (TSX-V: TIG) (“Tigray” or the “Company”) announces that a National Instrument 43-101 technical report has been filed for the Terakimti volcanogenic massive sulfide deposit on the Company’s 70%-owned Harvest project (the “Harvest Project”) located in the Arabian Nubian Shield in northern Ethiopia. There are no material differences between the mineral resource estimates contained in Tigray’s news release dated January 27, 2014 pertaining to the Harvest Project, from those contained in the technical report filed today.

The report has been filed under the Company’s profile on SEDAR at www.sedar.com and is available on Tigray’s website at www.tigray.ca.
